The TA supports the improvement of water and wastewater services in the large town of Mwanza (population 620.000) and 3 smaller satellite communities (Misungwi, Magu and lamadi) total population 80.000) within the framework of the Lake Victoria Water and Sanitation Initiative. For Mwanza, the purpose is:
  - to identify and refine hydraulically future proof immediate investments to detail design level from an existing body of designs, mainly in water supply networks;
  - to prepare a master plan for water and wastewater with short and long term investment plans and preliminary designs – complemented with a hydraulic model of the water supply network with operational recommendations;
  - to frame investments in informal settlement sanitation;
  - and to produce tender documents for implementation and supervision and/or detailed design, as applicable, and to assist with the procurement process.For the satellite communities, the purpose is to create plans, feasibility studies and short/long term investment plans as well as preliminary designs and tender documents for cost effective and affordable water supply. A significant body of studies and designs exists for both Mwanza and the satellites. The TA will include system diagnostic work and site investigations.
